

DEPARTMENT OF MECHATRONICS ENGINEERING

PRESENTS

KRIZEN

IoT WORKSHOP

THE COMPLETE GUIDE

IoT Workshop

Internet of Things refers to billions of physical devices that are connecting and sharing data with each other over the internet. IoT is making the fabric of the world around us smarter and responsive, merging the digital and physical world. Every object around us is connected to the internet and sending data back and forth between them. Soon, more and more Internet-based Gadgets and devices are likely to be used. As a result, a massive number of job opportunities will be created in this sector. Anyone aspiring to become an ensconced engineer should pursue knowledge of the Internet of Things.

The main objective of this workshop is to give you an introduction to IoT and various types and methods in creating an IoT product. This workshop gives you the knowledge to get you started with IoT.

Following topics will be discussed in this workshop,

1. IoT basics
2. Data Acquisition
3. Process and Management
4. Data visualization and analysis
5. Business software Integration

Date : 15/09/2021

Timing : 2.00 PM

All are instructed to attend the workshop on time. Only the participants who attended the workshop will be provided the certificate. The meeting link will be sent via e-mail and WhatsApp group **one day** prior to the event.

We hope that you feel happy working with us. If any queries, feel free to contact us at any time
